### **About DWW:**

***Serving communities in need so that they can build healthier and happier futures.***

We believe that good health enables people and communities to define their own future. Without good health, a parent cannot take care of their family, or a child cannot meet their full potential, and communities miss out on a chance to grow and contribute to their collective well being. Access to quality healthcare is not a privilege, it is a human right and we work towards making that a reality for everyone, especially the poorest.

### **About the PGF Training:**

The Postgraduate Fellowship (PGF) in Migrant and Refugee Health Programme is centred around the delivery of 7 independent modules, see Table 1 below. The PGF aims to provide knowledge and best practices of identified clinical topics specifically designed for migrant and refugee camp settings. A wide range of methodologies will be used including eLearning, didactic lectures, group discussions, case-based scenarios, simulated exercises with props, and clinical shadowing and teaching in the Rohingya refugee camps. These modules have been carefully and sensitively developed by healthcare experts around the world with the current situation in Bangladesh in mind.

<b>Module Number</b>	<b>Module Title</b>
1	Health in Humanitarian Emergencies
2	Triage and Acute Care Management
3	Communicable Diseases
4	Non-Communicable Diseases and Palliative Care
5	Mental Health in Humanitarian Emergencies
6	Sexual and Reproductive Health, Family Planning and Gender Based Violence
7	Clinical Assessment, Professional Practice, and Communication Skills

Upon successful completion of the PGF and mandatory attendance of over 75% of the lectures, you will receive:

1. Doctors Worldwide Postgraduate Fellowship (PGF) in Migrant and Refugee Health Certificate & Competency document
2. Basic Life Support Certification (DWW)
3. Emergency, Triage, Assessment and Treatment (ETAT) (WHO)
